COUNTY OF ORANGE

PRETRIAL RISK ASSESSMENT PAPER PILOT STUDY¹ RESULTS SUMMARY

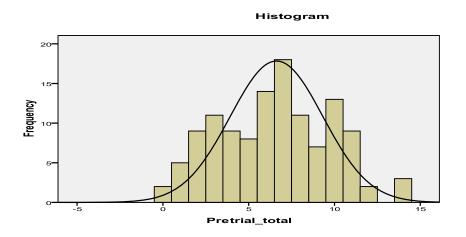

(Pretrial Supervision 9.24.09 Meeting)

OBJECTIVE

To conduct a formal risk assessment of a small convenience sample of historical felony pretrial detention cases to determine if a potential population of eligible supervised pretrial release defendants could be identified.

STUDY OVERVIEW

- A pretrial risk assessment instrument was drafted based on two existing validated instruments from Ohio and Virginia. (Validation based on risk for "FTA" and "new offenses" related to pretrial release time period. Other instruments reviewed include not yet validated tools from San Mateo CA, Multnomah OR, Monroe NY, and Kentucky.)
- 151 pretrial detention case packets representing all Orange County courts were "systematically" selected from the year 2007 to score using this initial risk assessment tool.
 - (*) 30 of the 151 case packets were subsequently excluded in the Risk Assessment scoring process, 19 due to questionable citizenship status and 11 due to other factors such as insufficient assessment information, etc.
- Risk Assessment scores for the **121 pretrial detention cases** ranged from 0 to 14 (maximum possible points of 20).

Mean =6.51 Std. Dev. =3.259

Preliminary risk assessment categories established are as follows:

Low Risk Group: Score 0-4N = 36Medium Risk Group: Score 5-8N = 51High Risk Group: Score 9+N = 34

SHunt - 1 - 5.19.09

¹ This study was undertaken to identify a potential group of felony pretrial defendants eligible for supervised pretrial release consideration through conducting a paper risk assessment on a small sample of 2007 pretrial detention cases. Orange County staff participating in the planning and implementation of this study included the following: Superior Court Planning and Research - Sandra Hilger, Dan Petras, Melissa Lee (Judicial Fellow), and Mark Romain (Court Intern). Probation Research - Shirley Hunt, Marya Forster, and Sharon Ishikawa; Sheriff staff - Tracy Carroll.

FINAL DRAFT: Orange County (3.16.2009) PRETRIAL RISK ASSESSMENT FOR PAPER PILOT

DEFENDANT	I.D. # CITY OF RESIDENCE:

RESULTS

92 DEFENDANTS WERE ARRAIGNED (29 were not arraigned/no further court records)

- o 16 of the 92 defendants were sentenced at arraignment
- o Pretrial outcomes for remaining 76 defendants
 - o 21 released (7 misconduct)
 - o 55 not released

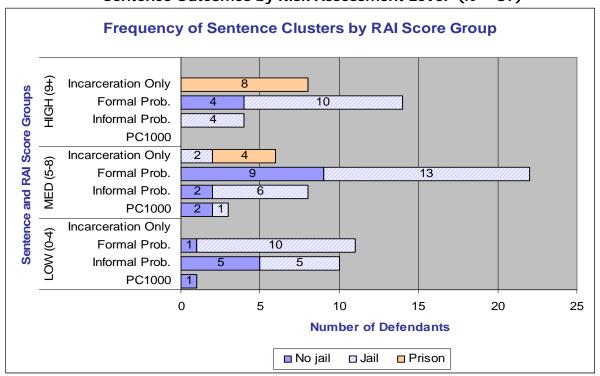

Arraignment To Pretrial Outcomes By Risk Score (N = 76)

	8	7	1	1	
	9	3	-	-	
	10	8	-	1	
High (N=22)	11	6	-	-	
	12	1	-	-	
	14	3	-	-	

SENTENCING STATUS FOR 92 DEFENDANTS

- o 2 still pending as of April 2009
- o 3 dismissed
- o 87 sentenced

Sentence Outcomes by Risk Assessment Level (N = 87)

KEY FINDINGS

- Risk Assessment instrument and risk categories seem to have some validity based on pretrial and sentencing outcomes
 - o Proportion released is highest in low-risk, decreases with risk level increase
 - Sentencing outcomes generally support the current risk categories (i.e. for low risk 12/22 received informal probation or PC1000; high-risk - 8/26 received prison sentences)
- Outcomes by Risk Scores and Risk Levels:
 - Pretrial outcomes support that defendants with 0 to 4 risk scores are likelier now to be released pretrial
 - o Medium risk cases (N = 39 risk score of 5 to 8) had more serious sentencing outcomes but the majority were formal probation (N = 22) or informal probation (N = 8).
- Jail Overcrowding Committee was interested in targeting offenders with risk scores up to "8" for Pretrial release. The medium risk group (score of 5 to 8) would be considered for "supervised release".

3

Due to the limitations of this study's methodology, the findings above must be viewed with caution. It is unknown how representative this group of cases is of the more than 20,000+ detention cases processed during calendar year 2007.
